Building Infrastructure for Economic Development

Joe A. Sumners, Ph.D.
Executive Director

Government & Economic Development Institute

Joe A. Sumners, Ph.D.
Executive Director
What is Economic Development?

“Economic development is a process by which a community creates, retains and reinvests wealth and improves the quality of life.”

- David Dodson, MDC Inc., Chapel Hill, NC
“Some see private enterprise as a predatory target to be shot, others as a cow to be milked, but few are those who see it as a sturdy horse pulling the wagon.”

- Winston Churchill
Core Economic Development Activities

- Business recruitment and attraction
- Business retention & expansion
- Entrepreneurship & small business development
- Commercial & retail development
- Tourism & retiree attraction
- Community development
Economic development is found at the intersection of the public and private sectors.

- Involves government efforts to facilitate increased private sector growth and investment.

A strong private sector economy depends on effective government investment and decision-making (education, infrastructure, incentives, and agency support).
Business Recruitment:

- The Process

- What companies are looking for
How the site selection (elimination) process works

- Role of Internet research in site selection.
- Site visits now occur after 80% of the decision is already made, and communities never know if they are under consideration for a project.
- The process is extremely competitive.

Realistic vision and strategies

- All communities are not created equal.
- Understand your strengths and limitations.
Competitive Site Selection Screening Process

- Define Search Region
- Regional Screening based on Project Criteria
- RFP & Proposal Screening
- Site Visits / Comparative Assessment
- Cost Modeling / Incentives
- Risk Analysis

Source: McCallum Sweeney Consulting.
Business Site Selection (Elimination)

- Clients/consultants seek to eliminate sites & buildings based on project requirements

- Ultimately, projects locate based upon an optimum, risk adverse, *business decision*!

Essential to Have:

Strong Community Infrastructure
STRONG LOCAL ECONOMIES ARE BUILT UPON STRONG COMMUNITIES.

Economic development requires a foundation upon which to build.

- **Physical Infrastructure**: Roads, water, gas, electricity, sewers, and telecommunications.
- **Human Infrastructure**: An educated and skilled workforce.
- **Civic Infrastructure**: Strong local leadership, vital community institutions, public involvement, and a community mindset of pride and optimism.
Economic Development Strategies

- Industrial Recruitment
- Existing Business
- Entrepreneurship
- Retail & Commercial
- Tourism

Community Development

- Physical Infrastructure
- Human Infrastructure
- Civic Infrastructure
1. Leadership & Citizen Participation
   (civic infrastructure)
2. Workforce Development & Education
   (human infrastructure)
3. Infrastructure & Communications Technology
   (physical infrastructure)
Physical Infrastructure
physical infrastructure

- “Product” - developed, or developable, buildings and sites.
- Roads, water, gas, electricity, sewers, and telecommunications are necessary for economic growth.
- Broadband – has become a core infrastructure for the New Economy.
Telecommunications Infrastructure: Like Electricity in the 20th Century . . .

“…Broadband is a foundation for economic growth, job creation, global competitiveness and a better way of life…It is changing how we educate children; deliver health care; ensure public safety; engage government; and access, organize and disseminate knowledge.”

– Connecting America: The National Broadband Plan

“. . . broadband has become as essential to individual and community economic prosperity as electricity and roads.”

– speedmatters.org
Human Infrastructure
Workforce Development

- The number one issue in economic development today is the quality of a community’s workforce.
- Companies will not choose to expand or locate in the community if they do not feel they can find the workers they need.
- Strengthening the workforce development system through the business community, public school systems, and community colleges must be of the highest priority for local economic development.
- “Human Infrastructure”
Mega-Trends Impacting the Economy and Workforce

1. Globalization

2. Technology
“National recovery won’t bring jobs back to the rural South. Production has moved to other countries with lower wages, or plants have substituted technologically advanced machines for people. Tens of thousands of jobs are not coming back.”

“The State of the South 2002: Shadows in the Sunbelt Revisited” (MDC, Inc.)
Goodbye Old Economy Jobs

Projected fastest declining occupations by 2018:
(Alabama Department of Industrial Relations)

- Sewing machine operators
- Textile machine setters, operators & tenders
- File clerks
- Order clerks
- Computer operators
- Mail clerks & mail machine operators
Projected fast-growing occupations by 2018:
(Alabama Department of Industrial Relations)

- Pharmacists
- Physical Therapists
- Registered Nurses
- Computer software engineers
- Network systems and data communications analysts
- Physician assistants
- Home health aides
- Aircraft assemblers, mechanics and service technicians
- Welders
## Growing Need for a Skilled Workforce

Source: U.S Bureau of Labor Statistics
Globalization and Technology: Implications for Workforce

1. Need fewer people to be productive (more capital-intensive, less labor-intensive)

2. Fewer low-skilled jobs (outsourced)

3. Talent bar is much higher
   - Need for higher skilled, educated workers
   - Critical need for improved K-12 education and workforce training system
Civic Infrastructure

Citizen Engagement
Collaborative Leadership
“Never doubt that a small group of thoughtful, committed citizens can change the world. Indeed, it is the only thing that ever has.”

- Margaret Mead
“What stands out in the high-achieving community is not so much the characteristics of the leaders as their number . . . The high-achieving community had ten times more people providing leadership than communities of comparable size. . . And its leaders function, not as gatekeepers, but as door-openers, bent on widening participation.”

- Dr. David Mathews, president of the Kettering Foundation
Prosperous communities recognize the value of local and regional cooperation and collaboration.

County and city governments, chambers of commerce, schools, civic organizations, and private sector groups WORK TOGETHER!

Public-private partnerships and collaborations, communication, cooperation, and planning are essential if the community is to ensure a strong economy, quality schools, and superior quality of life.
It is of critical importance to take care of, and involve, local business leaders.

- Importance of BRE (where the jobs are)
  - Understand and address the needs of business
- Local business can be your best recruiters (or worst)
Essential to Have:

Professional Leadership, Structure, and Planning
Structured and Professional Economic Development Program ensures that:

- Current and relevant information is maintained and used to make decisions
- Action plans are developed and implemented
- Information is shared with external and local audiences
- Local sites are marketed and sold
- Actors in the local economic development system are working together
You have to know your product before you can sell your product.

Information is the currency of 21st century economic development.

- With the Internet, site selectors can develop short lists without leaving their desk or picking up the phone.

Maintaining relevant information and making it available is a key economic development role.
Diverse Strategies

- There is no “one size fits all” approach to economic development.

- The key is to match particular strategies with the assets of the community.

- The approach might include business retention and expansion, tourism, commercial and retail development, technology parks, agribusiness, retiree attraction, entrepreneurial support, or other kinds of development.

- Ideally, development will involve a diverse combination of strategies, which helps to achieve a more robust economy with multiple avenues for job growth.
Economic Development: Essentials

1. A strong community infrastructure
   - Physical
   - Human
   - Civic

2. Professional leadership, structure, and planning
