

Cybersecurity Primer

ACCMA Briefing

1/27/2021

CyberSecurity Training starts with the acknowledgement that **employees** are the weakest cybersecurity link.

Conversely, they're also the first line of defense against cyber attacks.

We need your help!

Some Stats - macro

- The global cost of cybercrime will reach \$10.5 trillion by 2025
- Greatest transfer of wealth in history
- A business falls victim to a ransomware attack every 11 seconds..healthcare/govt
- More profitable than global trade of all illegal drugs combined.

If it were measured as a country, then cybercrime would be world's third-largest economy after the U.S. and China.

COVID-19 is changing the world of work.....

.....especially the
cybersecurity
threat landscape

Ominous Trifecta

Attack surfaces are widening

Threats are increasing

Budgets are changing

Attackers have the advantage more than ever.....

Industry analysis

Incidents:	Total	Small	Large	Unknown
Total	32,002	407	8,666	22,929
Accommodation (72)	125	7	11	107
Administrative (56)	27	6	15	6
Agriculture (11)	31	1	3	27
Construction (23)	37	1	16	20
Education (61)	819	23	92	704
Entertainment (71)	194	7	3	184
Finance (52)	1,509	45	50	1,414
Healthcare (62)	798	58	71	669
Information (51)	5,471	64	51	5,356
Management (55)	28	0	26	2
Manufacturing (31-33)	922	12	469	441
Mining (21)	46	1	7	38
Other Services (81)	107	8	1	98
Professional (54)	7,463	23	73	7,367
Public (92)	6,843	41	6,030	772
Real Estate (53)	37	5	4	28
Retail (44-45)	287	12	45	230
Trade (42)	25	2	9	14
Transportation (48-49)	112	3	16	93
Utilities (22)	148	5	15	128
Unknown	6,973	83	1,659	5,231

"Vectors & Actors"

- 21% Government Based
- 77% involve employees
- \$1 cybercrime tools and kits
- 90% of cybercrime victims **DO NOT** report it
- Email responsible for spreading 92% of all malware
- U.S. target of 86% phishing attacks
- 70% of employees don't understand cybersecurity

2020 Data Breach Investigations Report

2019-2020 Ransomware Attacks on Public Entities

More than 346 state and local governments
browsided by ransomware attacks

Big Picture: CyberSecurity Encompasses hundreds of elements at different levels

Easy to get lost in the noise..... 8

Reality

- Changing tech behavior – culture item
- Focus on what will really mitigate risks
- Education of employees is core
- 3 primary risks emerge

3 Major Risk Points

1. Passwords: The most critical aspect of password security is how employees use their passwords.
2. Phishing: The focus here is on identifying indicators of phishing emails. Ransomware payload
3. Backups: Now more important than ever...but are they current & tested?

1) Password Dilemma

- 98% of employees do not have a real strategy on passwords
- 60% of employees use the exact same password for everything they access
- 1961 technology....a problem

**TREAT YOUR
PASSWORD
LIKE YOUR
TOOTHBRUSH**

**CHOOSE A GOOD ONE
CHANGE IT REGULARLY
NEVER SHARE IT**

Creating Strong Passwords

- Develop a strategy. #s Only going up 
- Use phrases or technology
- Go Sea 5helby! (easy to remember, spaces make it very secure)
- The phrase above is magnitude of orders more secure than
“D@ught3rsN@m3!*%\$#@!%-2020_1”

10 to 14 digits

LastPass...

Passwords

PASSWORD LENGTH	POSSIBLE COMBINATIONS	TIME TO CRACK
		S = SECONDS H = HOURS M = MINUTES Y = YEARS
4	45697	< 1 S
5	1 1881376	< 1 S
6	308915776	< 1 S
7	8031810176	~ 4 S
8	208827064576	~ 1.5 M
9	5429503678976	~ 45 M
10	1 41 1677095653376	~ 19 H
11	3670344486987780	~ .1 Y
12	95428956661682200	~ 1.5 Y
13	248115287320374E4	~ 39.3 Y
14	645099747032972E5	~ 1,022.8 Y
15	167725934228573E7	~ 26,592.8 Y
16	436087428994289E8	~ 691,412.1 Y
17	1 13382731538515E10	~ 17,976,714 Y
18	2947951020001390E10	~ 467,394,568 Y

In 2010, an 8 character password would have taken 2.25 years to crack. The same password now would take under 2 mins to crack.

MFA (multi-factor authentication)

*Best Practice
on sensitive
datasets*

"2 Factor"

*1) Something
you know*

*2) Something
you have*

2) Phishing

- Method of fraudulently acquiring sensitive information via trickery.
- Your employees are the primary targets, they need to be prepared, informed, weaponized as your first line of defense.
- Training employees how to recognize and react to phishing (emails, txt or phone) is your best security ROI.

Phishing

WHAT YOU NEED TO KNOW

SCAMMERS ARE AFTER YOUR

8 Take Aways

- Use **extreme** caution when clicking any hyperlink within an email.
- Stay on latest version of operating systems (PC & Phone) and maintain all key security patches (to the extent possible).
- Only use business email for business. Many nefarious groups tap shopping sites email data.
- Only use business web browsing for business. Many shopping sites have a poor track record for controlling plugins and other code running on their sites.
- Do not use online email at work (while on a networked device). Many security layers are bypassed by opening external mail on network.
- Encrypt mission critical data stores on PC's, Servers and ALL portable data which includes iphones, USB thumb drives, tablets, laptops, etc.
- Ensure core Servers & PC's are backed up on a regular schedule
- Ensure virus/malware control are up to date and active on all PC's that are used – home & work – any data at rest (thumbs, cloud storage, etc.)
